LEA INSPECTION AND ENFORCEMENT TRAINING SCHEDULE

LEA Training Schedule
Inspection and Enforcement Topics

Spring 1997 Calibrated Enforcement training: This comprehensive statewide training will focus on interpreting and evaluating State Minimum Standards in the field at solid waste management facilities. This training will include Board, LEA, and operator representatives as both trainers and trainees.

Summer 1997 Landfill Gas Monitoring Procedures: Currently, Board staff is developing Landfill Gas Monitoring Procedures (LGMP) for Board inspection staff use and possible issuance as an LEA Advisory. This training session is tentative, contingent upon a Board/LEA training workgroup recommendation regarding the immediate need for such training in light of the comprehensive gas monitoring and control training scheduled for Spring of 1998. If conducted, this training will focus specifically on how to monitor for landfill gas. It is envisioned that this training would be made available to LEAs upon request.

Fall/Winter 1997 Enforcement Policy training: This training will focus on investigative techniques, enforcement options, and various strategies LEAs have successfully implemented to gain compliance. This will include LEA and Board staff as trainers and trainees and will be available to LEAs upon request.

Spring 1998 Comprehensive Explosive Gas Training: This statewide training will focus on landfill gas monitoring and control, including the application of explosive gas control standards and compliance plan evaluation. This training will include Board, LEA, and operator representatives as both trainers and trainees.
